

TATIANA MUÑOZ ARIAS

Business Intelligence Analyst | Data Scientist

Email: tatiana.441@gmail.com | LinkedIn: [linkedin.com/in/tmarias](https://www.linkedin.com/in/tmarias) | GitHub: github.com/tatiana441

Portfolio: tatiana441.github.io/portafolio | Languages: Spanish (Native), English (B2), Portuguese (Intermediate), Korean (Basic)

PROFESSIONAL PROFILE

Business Intelligence Analyst with **5+ years of experience** in data analysis, visualization, and executive reporting. Specialized in SQL, Power BI, and Excel to transform complex datasets into actionable insights that drive strategic decisions. Proven experience in **investment and project governance**, **Oil & Gas**, and **Pan-American markets**, with skills in geomechanics, well monitoring, and KPI optimization. Strong knowledge of **Six Sigma** and **Agile/Scrum** methodologies. Proficient in AI tools such as Claude Code, ChatGPT, Cursor, and Gemini for automation and content creation.

PROFESSIONAL EXPERIENCE

Governance Management Analyst

SUMMUM

March 2026 - Present | Latin America | Hybrid

- Executive Investment and Project Analytics:** Developed and enhanced executive Power BI dashboards for investment and project portfolio monitoring, integrating governance milestones, CAPEX approvals and releases, budget execution, and S-curves.
- Approval Workflow Analytics:** Designed a Power BI reporting solution to monitor an operational approval workflow involving multiple technical and managerial approvers, improving traceability of pending, approved, and rejected requests.
- AI-Assisted Document Automation:** Developed a Python-based application that generates technical specification documents from Excel input codes and a controlled Word document library, using deterministic logic to prevent missing, duplicated, or fabricated content.
- Automated data transformation with Power Query, improving the availability and consistency of management information.

Key Achievements:

- Improved the availability and consistency of executive information for investment and project portfolio decision-making
- Increased traceability of a multi-approver workflow through indicators and Power BI reporting

Business Intelligence Analyst II / Reporting Analyst Bilingual

Teleperformance

March 2021 - Present | Remote (5 years)

- Advanced Data Analysis and Query Management:** Utilized SQL for advanced queries, ensuring data accuracy and integrity for analytical purposes. Managed and cleaned large datasets using Excel and Power BI to enhance decision-making processes.
- Dashboard Creation and Data Visualization:** Created interactive dashboards in Power BI to visualize key business insights, trends, and KPIs, enabling leadership to make data-driven decisions.
- Executive Presentations and Reporting:** Designed and presented executive-level reports, synthesizing KPI and metrics analysis to drive key business strategies and decisions.
- Customer Experience and CSAT Analytics:** Analyzed customer satisfaction data to identify factors associated with low CSAT scores, applying ETL and NLP techniques to unstructured text in Python.
- HR and Workforce Analytics:** Conducted workforce analytics evaluating attendance trends, monthly performance, and tenure, structuring the process in Jupyter Notebook.
- Monitored and controlled quality, productivity, and first contact resolution KPIs for high-volume BPO operations.
- Analyzed databases extracted from client applications, designing strategies that generate value at the lowest possible cost.
- Directly responsible for reporting to Regional Office and Operations as required.

Key Achievements:

- Delivered actionable insights that helped drive strategic decisions for the Pan-American market
- Implemented automated dashboards that reduced reporting time by 40%
- Connected customer sentiment with operational performance indicators through CSAT and HR analytics

Geomechanics and Wells Monitoring Analyst

SGS Colombia S.A.S.

December 2022 - March 2025 | Hybrid (2+ years)

- Real-Time Geomechanical Monitoring:** Analyzed and monitored geomechanical well data in Piedemonte, Akacias, Castilla, and Chichimene fields using specialized EcoAGE software.
- Data Analysis and Reporting:** Interpreted large volumes of drilling and geomechanical data to identify trends, correlations, and anomalies. Prepared detailed reports with actionable insights for engineers and operations managers.

- **Collaboration and Problem-Solving:** Worked closely with multidisciplinary teams to support drilling decision-making and ensure safe and efficient operations.
- Monitored critical events in real-time such as kick detections, circulation losses, and stuck pipe to prevent NPTs.

Key Achievements:

- Improved real-time monitoring process, ensuring data accuracy
- Contributed to reducing NPTs by providing actionable insights and operational recommendations
- Supported operational efficiency by identifying key correlations and trends in drilling operations

TECHNICAL SKILLS

Data Analysis (5 years): SQL (Advanced), Excel (Power Query, VBA, DAX), Python (Pandas, NumPy, Matplotlib, Seaborn, EDA), Data Mining, ETL, Data Cleaning, NLP	Visualization & BI (5 years): Power BI (Dashboards, DAX), Power Pivot, Data Visualization, Executive Reporting, Data Storytelling
Industries: Oil & Gas (5 years), Geomechanics, Pan American Market (5 years), BPO Operations, Quality Assurance	Methodologies: Six Sigma, Agile/Scrum, Project Management (1 year), Jira, Strategic Planning, Governance Reporting, Automation, Agency Relations
Specialized Software: EcoAGE (Ecopetrol), SQL Server, PowerPoint, Google Sheets, Jupyter Notebook	AI Tools & Automation: Claude Code, Claude AI, ChatGPT, Gemini, Cursor, Lovable, Kiro, n8n, Content Creation
Data & Collaboration Environment: Microsoft 365, SharePoint, Microsoft Lists, Power Automate, Forms, REST APIs, OData	

FEATURED PROJECTS

Customer Satisfaction Analysis | [GitHub](#) | [Live Demo](#)
Python, Pandas, Jupyter Notebook, Data Visualization, EDA
Exploratory data analysis (EDA) to identify patterns and customer satisfaction drivers. Published interactive web dashboard with data quality analysis and KPI improvement opportunities. Portfolio project demonstrating reproducible analytical workflows.

Mi Canasta - Budget Manager | [GitHub](#)
Python, Flask, HTML, CSS, JavaScript
Full-stack web application for budget and monthly shopping expense management. Complete CRUD, expense tracking, automatic budget calculation, and responsive interface. 59 commits demonstrate iterative development.

Petroleum Data Visualization App | [GitHub](#)
MIT App Inventor, Android, AI Integration, Google Sheets
Android mobile app for petroleum data visualization through charts and AI-powered analytical summary generation. Google Sheets integration, statistical metrics calculation (correlation, slope, intercept). Downloadable APK available.

EDUCATION

Master's Degree in Hydrocarbon Engineering Universidad Industrial de Santander (UIS) <i>Graduation: 2024</i>	Business Administration Universidad Industrial de Santander (UIS) <i>Graduation: 2025</i>	Petroleum Engineering Universidad Industrial de Santander (UIS) <i>Graduation: 2019</i>
